

I have a Therapy Dog and work with children in an elementary school here in Connecticut. Some of the children have difficulty reading, some have other difficulties at home or in school, but I was blown away at the impact the dog had with all of these children. It was way beyond anything I envisioned.

I know that having a dog there would be a great comfort those children who have undergone a trauma and are in the difficult position of having to testify in a courtroom.....a frightening thing in itself. Please help these children by passing this bill.
